Application No. 10/081,478 Amdt. Dated May 30, 2006 Reply to Office Action of December 27, 2006

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

PAGE 02

Listing of claims:

1-20 Canceled.

- 21. (New) An implantable article for separation and regeneration of tissue at a tissue defect site comprising microtextured upper and lower surfaces; said upper surface comprising grooves and ridges having a width and a height of about 2 to about 10 microns, proportioned to a cell morphology of soft tissue cells; and said lower surface comprising grooves and ridges having a width and a height of about 8 to about 25 microns, proportioned to a cell morphology of bone tissue cells for promoting bone tissue growth; said article being substantially planar and biocompatible.
- 22. (New) The article of claim 21, said article has a thickness of between about 200 and about 500 microns.
 - 23. (New) The article of claim 22, said article is flexible.
 - 24. (New) The article of claim 21, wherein said article is bloabsorbable.
- 25. (New) The article of claim 21, wherein said article is made of at least one material selected from the group consisting of polylactic acid homopolymers, polyglycollic acid co-polymers, polylactones, polypeptides, polyvinyl alcohols, Hench's bioglass, fibrinogen and polyimino-carbonate, and natural polymers including collagen and polysaccharides.

Application No. 10/081,478 Amdt. Dated May 30, 2006 Reply to Office Action of December 27, 2006

- 26. (New) The article of claim 25, wherein a weight of said material is in a range of one to five grams/cm².
- 27. (New) The article of claim 21, wherein said lower surface has osteoconductive chemical properties.
